(b) Maximum Lot Area Regulations

Lot consolidations created through subdivision maps or by means of building across lot lines or property lines shall be prohibited when such action would create a premise containing over fourteen thousand (14,000) square feet of lot area or over one hundred (100) feet of frontage along the front property line. This requirement is intended among other things, to deter massive, large scale developments inconsistent with the small scale pedestrian oriented objectives for the Redevelopment Subdistrict. The Mercado District, and those districts where Light Industry/Commercial Use land use categories are allowed, are exempted from the maximum lot regulations. Existing parcels in excess of fourteen thousand (14,000) square feet shall not be affected by Section 103.0959.

- (G) An unroofed portion of a structure or terrace less than three (3) feet above the surface ground level shall be permitted within the front yard setback area. Roofed, open appendages such as porches and balconies may encroach up to five (5) feet into the required front setback area. To qualify as open appendages, railings and enclosures not exceeding four (4) feet in height must be located on at least forty percent (40%) of the perimeter of such open appendage. Encroachments as permitted in Section 103.0959, and as amended from time to time, are not allowed on the street side, interior side or rear setback areas.

(2) Nonresidential

- (A) Front - zero, as described in Section 103.0959(e)(2).)

- (B) Interior side - zero. The “Hearing Officer” may require a ten foot (10 ft.) interior side setback where a project is adjoining an existing residential project in order to maintain adequate provisions for light and air.
 - (C) Street side - zero, as described in Section 103.0959(e)(2).
 - (D) Rear - three (3) feet for lots which abut an alley. On lots not abutting an alley the rear setback shall be zero.

- (3) Exception: In order to preserve the existing character of Logan Avenue, front setbacks facing Logan Avenue shall align horizontally with adjacent structures on either side, if adjacent structures exist.
- (d) Minimum Common And Private Exterior Areas
- (1) Residential or mixed use projects including residential development on the ground floor of the property shall dedicate at least ten percent (10%) of the gross lot area to common, exterior usable areas. These areas may consist of courtyards, patios, gardens or play areas and shall exclude walkways and access paths to dwelling units. Common, exterior usable areas shall be open to the sky, shall have a minimum dimension of twenty-five (25) square feet, and be centrally located within a project or between two (2) or more buildings, or readily accessible to the occupants of the dwelling units. Mixed use projects with exclusively upper floor residential units are exempted from Municipal Code section 103.0959.
 - (2) At least sixty percent (60%) of all residential units within a project shall provide a private exterior usable area for each unit. This area may consist of balconies, terraces, roof decks, or porches and shall have a minimum area of twenty (20) square feet, but shall not exceed one hundred (100) square feet in size. In projects containing twenty (20) units or more, up to fifty percent (50%) of the required private exterior usable area may be provided instead as common, exterior usable area.

- (3) Common areas and recreational facilities shall be located so as to be readily accessible to the occupants of the dwelling units and shall be integrated in the overall project design.

(e) Pedestrian Orientation Design Criteria

In order to encourage a pedestrian orientation on Logan, National and Newton Avenues, and Beardsley, Crosby, Main and Evans Streets, the following development standards shall apply to developments fronting those avenues and streets:

(1) Residential:

- (A) Residential buildings shall be required to be oriented toward the street and provide front, and side street facade features such as doors, windows, balconies, porches, terraces, wall offsets, varied materials, textures, colors, or any combination thereof. Windows shall be provided on the wall surface extending from the sidewalk up to twelve (12) feet in height. Wall offsets shall occur every forty (40) feet of linear street frontage.
- (B) Every dwelling unit (including those within mixed use buildings) shall have direct pedestrian access from both the abutting street and rear parking areas.
- (C) Not more than two ten (10) foot wide garage doors or a single sixteen (16) foot wide garage door shall be permitted on the front facade facing the above described pedestrian-oriented streets. Any covered parking accessed from such streets shall be fully enclosed. Open carports are not permitted except in the rear of the lot facing the alley.

(2) Nonresidential:

- (A) Nonresidential building walls shall be continuously extended at least sixty-five percent (65%) of the street frontage and shall be located at the property line, or within five feet (5') of the property line. Facade indentations shall be limited to five feet (5') in depth. The continuity of the required street wall may be interrupted if pasajes are provided. For purposes of this Division, the term "pasaje" means a mid-block pedestrian passageway flanked by uses which have entrances or windows

facing the passageway. On all corner parcels within the Redevelopment Subdistrict the building wall required by this Section 103.0959 shall occupy the corner facing the street intersection. No surface parking areas or garages shall be permitted on corners of lots facing a street intersection. If the premises are bounded on all sides by pedestrian-oriented streets as designated in Section 103.0959, an exception to this section shall be made by the Hearing Officer, as to one or two abutting streets bounding the parcel in question.

- (B) At least fifty percent (50%) of the first story area street wall surface shall incorporate pedestrian entrances, windows, display windows, or openings allowing views into atriums, courtyards and street oriented activities. Windows, openings and entrances shall be located at a “pedestrian height level,” which for purposes of this Division is defined as the wall surface extending from the sidewalk up to twelve (12) feet in height.
- (C) Street wall facades shall be enhanced through the use of expression lines, architectural details, materials and texture changes, artworks, awnings, canopies, or color. Facade treatment shall change every forty (40) feet of linear street frontage to avoid large monotonous developments.
- (D) Blank wall segments shall be limited to fifteen (15) feet in width, however, the maximum width may be increased to twenty-five (25) feet if the wall surface is enhanced with architectural detailing, ornamentation, or art work.
- (E) Surface parking occupying thirty-five percent (35%) or less of the linear street frontage shall be screened by a three (3) foot high solid wall or fence separated from the adjacent public right-of-way by a three (3) foot wide landscaped strip. This landscaped strip shall be achieved through the use of shrubs, vines, or ground covers. If surface parking occupies over thirty-five percent (35%) of the linear street frontage, the parking perimeter shall be defined by the wall or fence and landscaped strip required in Municipal Code Section 103.0959, or by arcades, colonnades or arches having a height compatible with the buildings on the premises and separated from the adjacent public right-of-way by the landscaped strip required in Municipal Code section 103.0959, or a combination of wall,

fence arcades, colonnades, or arches, and the required landscaped strip.

The required wall or fence shall be made of masonry, brick or similar materials compatible with the buildings on the premises. Chain link and similar type fences are not permitted.

All above-grade parking space visible from the public right-of-way shall be architecturally screened or enclosed.

Temporary, surface parking during the period of construction is exempted from Section 103.0959(e)(2)(E).

- (F) Off-street loading areas shall not be located immediately adjacent to avenues or streets listed in Section 103.0959(e).
- (G) The internal street system shall not be a dominant feature in the overall design; rather it shall be designed for the efficient and safe flow of vehicles without creating a disruptive influence on the activity and function of any common areas and facilities.

(f) Other Design Criteria

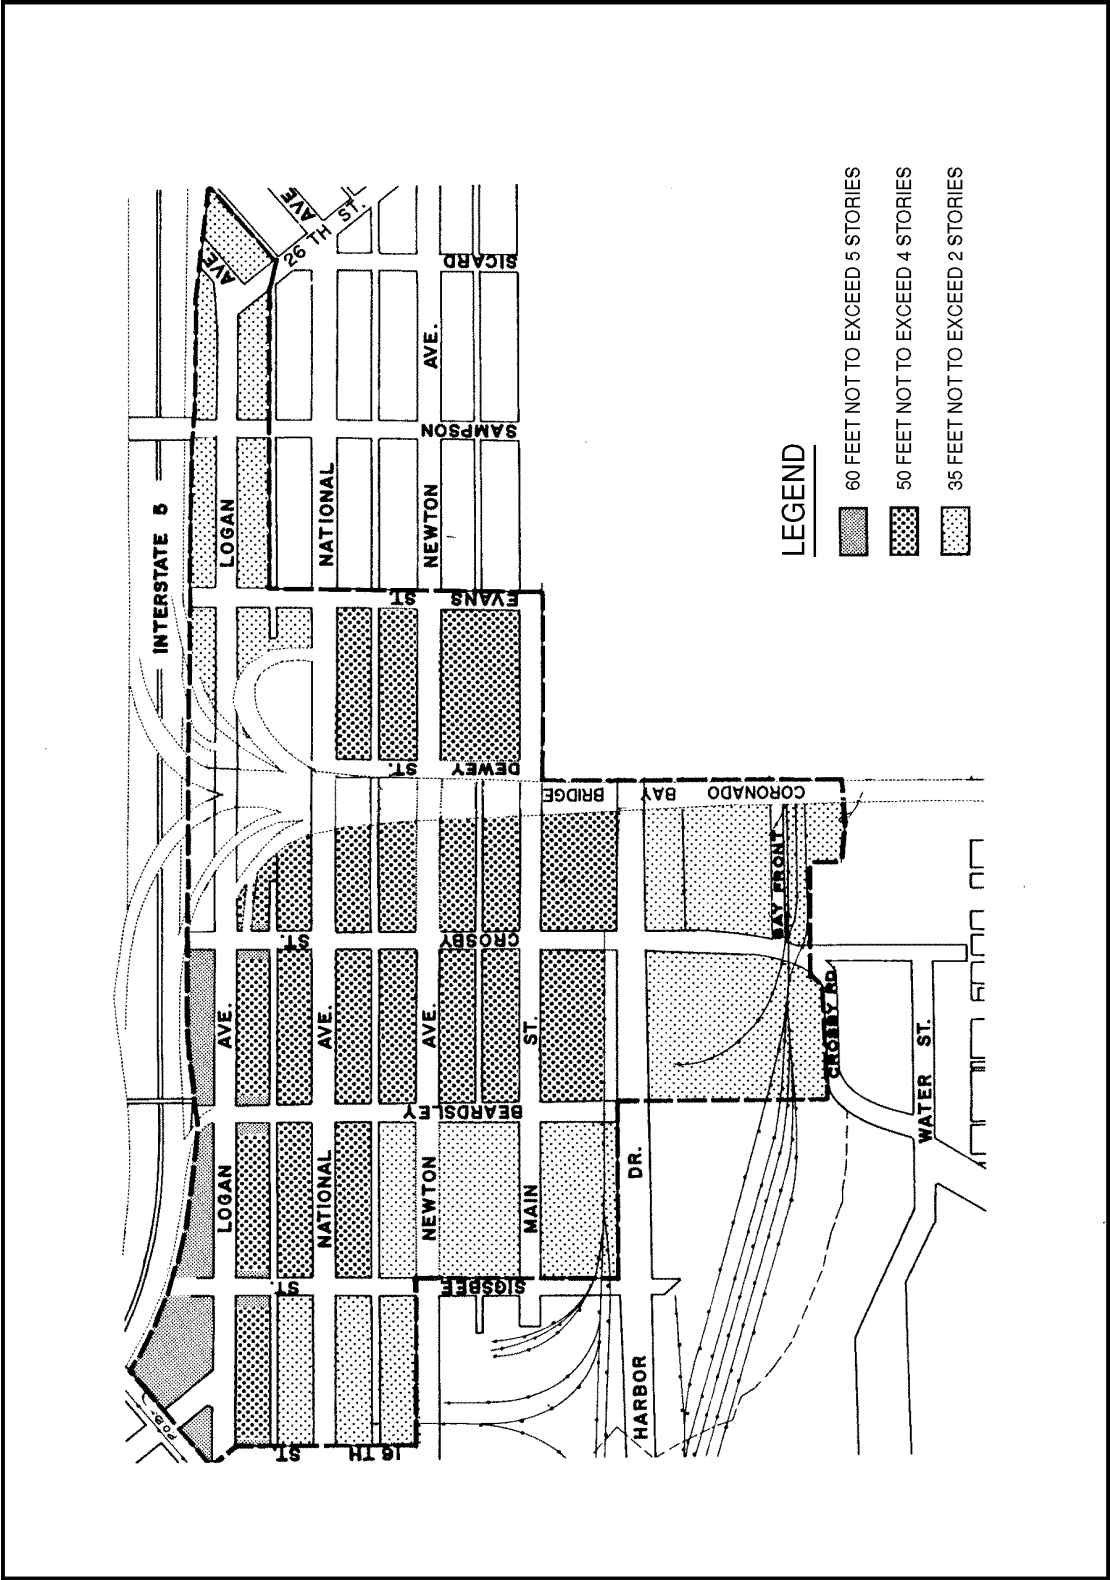

- (1) The facade of buildings having three (3) or more stories shall stepback at least once above the first story to allow for balconies, roof terraces, and decks, as described by Section 103.0959(d)(2).
